New Features of our Latest Release:
Enterprise 12.3

Dispatch Scheduler: Streamline Your Operations

Easily find, manage, create and dispatch work tickets to technicians. With a user-friendly interface, customizable views, drag and drop capabilities and quick searches, you will you will manage dispatching with ease. The module includes Dispatch Routing which integrates with your GPS and Google Maps™. Follow and coordinate real-time truck locations with pending work orders. You can also select the nearest technician to a work order, and with the map in view, click on a work order to see its location.
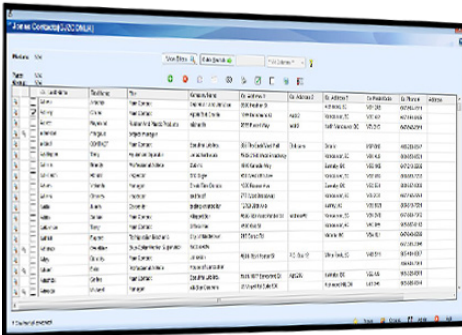

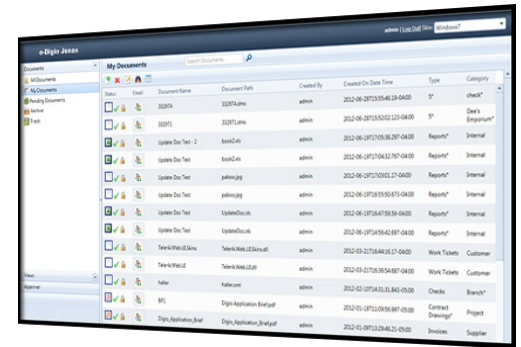

eMobile: Increase Technician Productivity

Increase productivity, customer satisfaction and reduce billing cycle times with eMobile. Your field technicians will be able to receive and manage work orders on any device including laptop, tablet or smartphone. Technicians will be able to enter costs, review history, add notes, capture and access equipment information, generate quotes, capture customer signatures and email or print a summary sheet for the customer. eMobile eliminates the need for technicians to return to the office to complete paperwork as well as double entry of work order data.

eDigio: Access Documents from Anywhere

With eDigio you, your field employees and other users can have access to any document wherever there is access to the internet. This add-on enables you to easily route documents for approval to third parties including architects, engineers and subcontractors.

Contacts Directory: A Single Place for all Your Contacts

The new Contacts Directory provides one place for all of your contacts with links to Job Cost, Job Documents and Accounts Receivable. With the ability to pull contacts into Jonas from Outlook via Excel, add photos, store memo information, and categorize contacts into groups for easy look-ups, managing your job contacts has never been easier.

Other Key Enhancements

12.3 also provides several enhancements to existing modules within the Jonas system. Enhancements include:

. Additional fields, dashboard reporting and business intelligence tools in DataMart to give you more insight into how your jobs are performing.

. Increased functionality to help you manage Project Documents including fields for drawing and specification numbers, sent logs, common phrases to streamline creating and documents and integration with the Contacts Directory.

. New Counter Sales features including the set up of discounts and coupons, new fields added, the ability to define GL Posting Account, Department and Sub-account for the methods of payment and more.
