

Access Key Business Information, Quickly and Easily

At Jonas Construction Software, we are always looking for ways to help you improve your business and ultimately increase your bottom line. This includes making it easier for you to access important information about your business. That's what our DataMart module is designed to do.

DataMart helps you save time in gathering and compiling information as well as recreating multiple versions of reports. With DataMart, you will have more visibility into your business so that you can make smarter, more informed business decisions.

Key Features and Benefits: DataMart

Enjoy Enhanced Reporting with DataMart!

With Data Mart you will be able to integrate data from multiple sources and across all **Jonas Enterprise** modules, create easy to read graphs, standardize data across your organization and report on trends – all without slowing down your operating system.

Data Mart is a SQL database that integrates seamlessly with the **Jonas Enterprise** core application so that as you input your data into **Enterprise**, your final reports will be automatically updated.
